Small White

Large White

Green-veined  
White

Orange-tip

Brimstone

There are over 50 species of butterfly in Britain. A lot are rare and can only be found in special butterfly reserves in remote parts of the country.

The twenty species above are some of the easiest to see.

When you see a butterfly approach is slowly without making any sudden movements. Don't try to catch it. Look carefully at the markings and compare them to the markings on the butterflies above.
