

# British Nature Guide

Here are pictures of eight of our most colourful species of birds. Draw a line to link the bird to the correct name. Use a bird book to find the answers if you are not sure.

Robin

Great Tit

Parakeet

Green Woodpecker

Pheasant

Nuthatch

Yellow Wagtail

Goldfinch

A lot of the common birds you see in Britain are mainly black in colour. Fill in the missing letters to name five of them. (The last one eats fish)
